WORK EXPERIENCE

Python Teacher
Basic Knowledge Secondary Schools

06/2021 - 12/2021   *Lagos, Ikeja*

Basic knowledge secondary school is a secondary school based in Nigeria

Achievements/Tasks

- Adopted the use of real life scenarios to break down programming concepts to student.
- Improved student interest in coding by exposing them to research resources like Google, Stack overflow, GitHub.
- Created a demo of Google Assistant, that could answer basic random questions. This increased the students cravings for learning.
- Created a blog using Python's Django Framework.

AMSB Connect LTD
Python Backend Developer

01/2022 - 10/2022   *Ogun, Nigeria*

AMSB connect ltd is a travel and tour organization.

Achievements/Tasks

- Developed an online form that uses a signature pad to make agreement between the client and company digitally, unlike before when all their activities were carried out physically.
- Improved the organization's revenue by developing a payment system on their website using the PayPal payment gateway.
- Increased productivity as booking and payment was done digitally by clients without the help of the company. co-workers were able to focus on pressing needs of client only.

EDUCATION

National Diploma
National Institute of Information Technology (NIIT)

01/2020 - 04/2021   *Lagos, Ikeja*

Experience in using PostgreSQL and SQL as database

SOFT SKILLS

Ability to troubleshoot, comprehend, analyze, research and resolve complex issues.

Strong interpersonal, verbal, and written communication skills.

PERSONAL PROJECTS

School Management System (10/2022 - Present)

- I embarked on this project voluntarily to improve my former high school. Although I haven't informed them yet.
- I intend to create features that handles students assignment, payment of fees, ability of parent to monitor their kids performances and for students to have a community for learning even when they are not in the school environment.
- Students will be able to chat, take on challenges with colleagues and make note online, even from their personal interactions.
- Currently working on this project using Django, React and Django Rest Framework.

Customer Relationship Management System (CRM) (07/2022 - 08/2022)

- I created this CRM system trying to solve relationship issues between customers and company.
- I implemented a feature that enables a customer get assigned to specific agent of the company for closer interaction between them
- The CRM enables us identify new customers, old customers and customers that are no more visiting

CYCOM (07/2022 - 07/2022)

- CYCOM is an ecommerce website I developed recently.
- implemented PayPal payment gateway to handle the payment.

CYPHER BLOG (06/2022 - 06/2022)

- Cypher Blog is an blogging website with features like commenting, news letter subscription and categorized content
